WinAVI All-In-One Converter adalah salah satu *software* yang boleh mengubah format satu-satu fail video ke format yang lain. Saya buat postingan ini memandangkan para pelajar saya akan menghadapi cabaran untuk mengedit video drama Arab yang mereka lakonkan.

Kemungkinan satu-satu fail video yang dirakam oleh kamera mereka tidak dapat diedit oleh perisian-perisian suntingan video tertentu. Sesetengah perisian ini hanya membenarkan *editing* fail AVI dan MPEG sahaja. Jadi, ia menimbulkan masalah bagi pelajar yang merakamkan video mereka dalam format selain daripada kedua-dua format tadi.

Berikut adalah maklumat mengenai WinAVI All-In-One Converter:
